

Accessing updated, local weather conditions, watching weather as it happens in real time, and receiving prompt alerts on a web-based system during weather events is significant. It enables us to respond more efficiently in providing information and making decisions.

**GREATER ORLANDO
AVIATION AUTHORITY**

Cyrus Callum, of the Operations Department
for the Greater Orlando Aviation Authority

ASK ABOUT WEATHER STATION

View and share weather data in real time from your own weather station and online weather center.

AUTOMATICALLY OPTIMIZE OPERATIONS DURING INCLEMENT WEATHER

When weather threatens your organization, you need as much advance notice and expert advice as possible to change plans, maintain safety, and optimize business continuity.

OVERVIEW

Make your severe weather plans in advance and automate decisions with:

- ▶ Local weather data from 17,500+ weather stations
- ▶ Lightning data from 1,800+ lightning detection sensors
- ▶ Facility-level weather observations
- ▶ Custom forecasts and threat analysis

BENEFITS

Whether you have one location or many, keep tabs on the weather everywhere to minimize financial risk and keep your organization moving forward

Know you are making the right decision with automated weather alerts and assurance from expert meteorologists

Get people moving faster with custom alerts that decrease the time between threat detection, notification, and operations modification

Improve situational awareness with access to real-time weather and lightning data from anywhere

KEY INDUSTRIES

- ▶ Supply Chain Management
- ▶ Pharmaceuticals
- ▶ Retail
