

Having Earth Networks at our facility has allowed us to be prepared for lightning situations.

The information we receive from the system allows us to communicate with our members and guests about where the lightning is, where it looks like it is moving and the approximate time it will take to become safe enough to go back out and play.

Brian Schuler, Director of Golf at Plantation Preserve (Florida)

PREMIUM MOBILE WEATHER APP

Ask about a subscription to Sferic Connect, our premium mobile application for extremely accurate, hyperlocal weather information and GPS location-based alerts.

KEEP YOUR MEMBERS SAFE FROM SEVERE WEATHER WITH AUTOMATED MONITORING & ALERTS

Protect staff, members, and patrons from dangerous weather conditions like lightning, pop-up thunderstorms, high winds, and extreme heat with the latest weather safety tools.

OVERVIEW

Our Club Safety experts work with you to build a scalable, custom weather solution that addresses your specific challenges and includes:

- ▶ Real-time weather monitoring
- ▶ Mass notification systems
- ▶ Multi-channel alerting
- ▶ Public information displays

BENEFITS

Automatically clear outdoor areas near and far when lightning approaches your club

Reduce false alarms with highly accurate alerts powered by a high-density total lightning detection network

Keep everyone informed of weather conditions with public weather displays, an online weather center, and countdown clock

Monitor for environmental factors that can affect groundskeeping activities and plan ahead

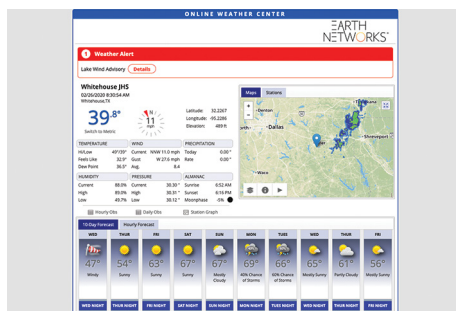

KEY FEATURES

- ▶ Full coverage indoor/outdoor lightning alert system
- ▶ Automated multi-channel alerting
- ▶ Real-time monitoring and reporting for 25+ weather variables
- ▶ Historical record of weather observations stored for 120 days
- ▶ Hourly and 10-day forecasts for your exact location
- ▶ 24/7 phone, email, and chat support from our meteorologists

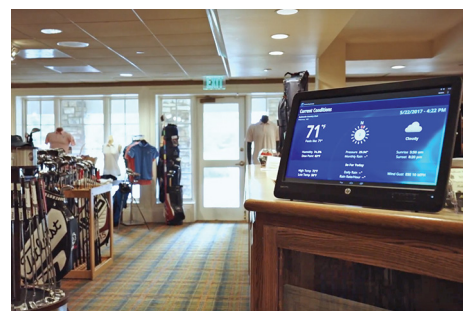

FLEXIBLE LIGHTNING DETECTION AND ALERTING FOR YOUR CLUB

Secure your entire club from the threat of lightning. Deploy a custom configuration of outdoor and indoor lightning sirens powered by the Earth Networks Total Lightning Network. With everything from 110db solar-powered horns to adjustable voice messages, you have complete control over where and how live-saving lightning alerts are issued at your club.
