

*Our district has over 200 facilities and, geographically, we're about the size of Rhode Island. Earth Networks enables us to give exact geographic severe weather warnings to our schools right when it's happening, right where it's happening and that's important.*

**Fred Cahill,**  
Safety Professional, Palm  
Beach County School  
District, Florida

### ASK ABOUT A WEATHER STATION

View and share weather data in real time from your own weather station and online weather center.

## MAINTAIN SAFE AND EFFICIENT FACILITIES WITH 24/7 WEATHER MONITORING, ALERTING, AND FORECASTING SOLUTIONS

When weather threatens your facility, you need as much advance notice as possible to secure assets and notify your visitors and staff.

### OVERVIEW

**Prepare for anything Mother Nature throws at you with full service support from Earth Networks. Secure your facility with:**

- ▶ Local weather data from 17,500+ weather stations
- ▶ Lightning data from 1,800+ lightning detection sensors
- ▶ Facility-level weather observations
- ▶ Automated weather monitoring and alerting
- ▶ 24/7 forecast support from professional meteorologists

### BENEFITS

Whether you have one location or many, keep tabs on the weather everywhere to keep facilities, visitors, and staff safe

Move weather-sensitive equipment indoors with advanced early warning of severe weather headed your way

Get people moving faster with automated alerts that decrease the time between threat detection and notification

Improve situational awareness with access to real-time weather and lightning data from anywhere
